

3MM & 5MM BLACK MILITARY WETSUIT

Conservatively all black, this wetsuit is perfect for pool training but it is equally suited to snorkelling, diving and any type of watersport activity you are interested in.

Available in a choice of two neoprene thicknesses, the 3mm is perfect for warmer tropical waters and the 5mm is best suited for more temperate climates. This long suit is manufactured from super comfortable flat-lock stitched neoprene which offers good insulation without compromising on movement and it features an extended zip tape for quick and easy solo fastening.

The rear entry YKK plastic zip has an internal neoprene protective panel, and the collar has an adjustable Velcro fastener tab for extra security. The knees and elbows have added reinforcement pads for extra protection in those high wear areas.

WHAT'S INCLUDED?

1. Full piece wetsuit
