

UTILITY DRYBAGS

This Utility Drybag is perfect for keeping equipment safe from exposure of contaminated flood waters.

Manufactured from high frequency welded TPU and fitted with a YKK® Aquaseal® zipper. It is supplied with integrated oral inflation tube, heavy duty plastic d-rings and threads easily through any belt.

Ideal for dry storage and carriage of equipment such as radios, flares, and personal, electrical or medical belongings. Depth rated to 30m

Northern Diver can manufacture custom fit drybags to house any item you require. Please call us to discuss and requirements you have.
