

MINI QUEST TORCH

Northern Diver's powerful Mini-Lux 'long-burn' underwater LED torch is now even brighter, with an up rated 230 Lumens output.

Our new Mini-Quest underwater torch has an 8.5 hour total (continuous) burn time, using specially developed 'variable output' technology.

(100% 'full power' output for 3.5hrs, which then gradually decreases over the remaining 5hrs burn time)

As with our original Mini-Lux underwater torch, the aluminium head provides maximum heat dissipation, making our Mini-Quest torch equally suitable for use out of, in or under water.

This Mini-Quest torch also features a rear mounted magnetic on/off switch, for easy underwater switching and it is supplied 'complete' with 4 x AA batteries.

- Mini-Quest 230 with Powerful 'Spot' Beam
- 8.5hr Total 'Continuous' Burn Time
- NEW Philips 'Lumileds' 3w Luxeon LED
- Depth Tested to 95 Metres
- Tough Polycarbonate Body with an Aluminium Torch Head
- Double O-Ring Seals
- Rear Mounted Magnetic On/Off Switch
- Optional Helmet Mount
- 4 x AA Alkaline Batteries (Supplied)
