

# PHANTOM CLEAR VISION MASK

The Clear Vision mask's rounded lenses provide an excellent field of vision. The coating on the lenses enhances vision below the surface and decreases glare above the surface. To top it off, the lenses are protected by Anti-Fog Technology.

Thanks to the double feather-edge silicone facial skirt, you'll hardly realise your wearing the Phantom Clear Vision. The comfort factor of this mask doesn't stop here either. The side buckles swivel with the diver's facial movements and absorb shock. Adjusting the mask is simple and swift, owing to the patented push-button system.

- Attractive rounded lens design that gives a superb field of vision
- Coated lenses
- Anti-Fog Technology
- Soft silicone facial skirt and strap
- Double feather-edge seal for comfortable fit
- Patented push-button adjustment buckles
