

190L NDB5 WELDED HOLDALL

The NDB5 welded holdall is constructed from a durable 210D nylon TPU with protective coating and has high frequency welded seams. The strong and spacious holdall is ready for action across a wide range of outdoor scenarios.

With an impressive 190L capacity in and one huge compartment this holdall should swallow up your bulky gear with ease!

These bags are renowned for their robust construction and durability making them first choice for countless divers, military/rescue teams and outdoor adventurers all over the world.

On this utilitarian duffel bag you'll also find three lifting handles, removable alpine-cut padded shoulder straps and webbing attachment points running down either side of the bag perfect for clipping your equipment to.

A welded inner bag constructed from 420D nylon TPU with protective coating and 2-way splash proof zips is supplied with each bag. Ideal to hold dry clothes.

Customer logos can be added to our bags upon request, please note an additional charge may be required. Contact us to discuss and arrange customising bags.
