

# CROSSLINE REACH CAPTURE DEVICE

20 years after its invention by swiftwater rescue guru, Dr Michael Croslin, the Reach remains a fundamental and essential piece of swiftwater rescue, technical hardware.

Used by Fire, EMS, Search and Rescue, Trekkers, Whitewater and Recreational boaters, this multi-use protective device is highly effective for line-crossing, remote anchoring, stream crossing, quick access, and egress in rescue operations.

Considered PPE in the professional Swiftwater Rescue arena, it ultimately functions as a capture device, securely capturing another line from afar. When thrown across any line, rope or cable, it will cross, clip and capture the line as securely as a carabiner.

Extensively tested, it works extremely well in even the most extreme situations, such as severe gradient and flow conditions, allowing faster and safer rescues for individuals and teams alike.

It is a simple, yet effective, tool that can ultimately save lives.

## FEATURES

- Cross Reach can support up to 900kg (2000lbs) of pull strength
- Securely grab ropes, lines or cables at a distance on land or in water
- Collapsed down and is easily stored inside your pfd pocket
- Reach rope retriever For water rescue
- Safely access any discharged line remotely via line capture
- A fast and safe device that works well even in severe gradient and flow conditions
- Main body: 6061-T6 aircraft aluminium
- Spring clips + pins: 304-type stainless steel

Deployed size:  
110\*110\*100mm (4.3\*4.3\*4.0")  
Stowed size:  
50\*50\*100mm (2.0\*2.0\*4.0")

Weight: 318g (0.7lbs)

Colour: available in red only

## Cross. Clip. Capture.

## DESCRIPTION

RESCUE KIT
